

CATTLE PANEL TRELLIS Installation

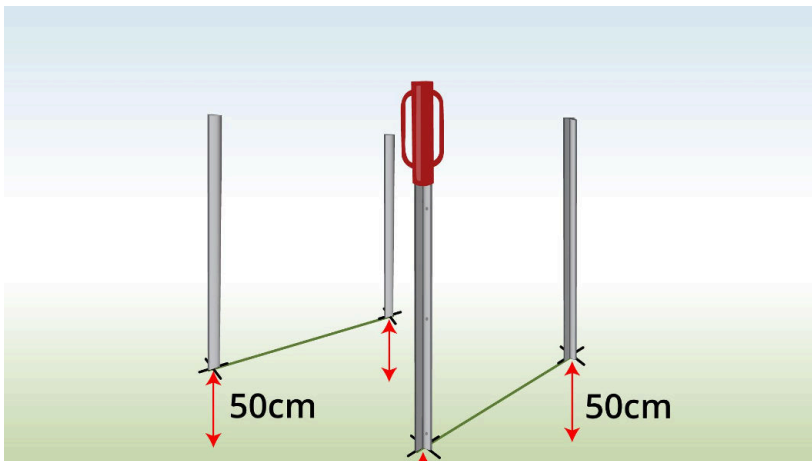

THINGS YOU'LL NEED

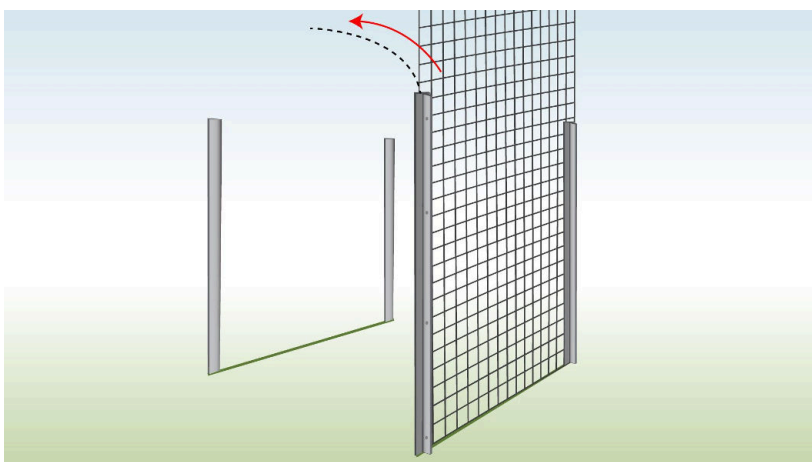

- Panels
- T posts
- Cable ties
- Post driver
- Level
- Tape measure

INSTRUCTIONS**Step 1: Measure Area & Mark Post Locations**

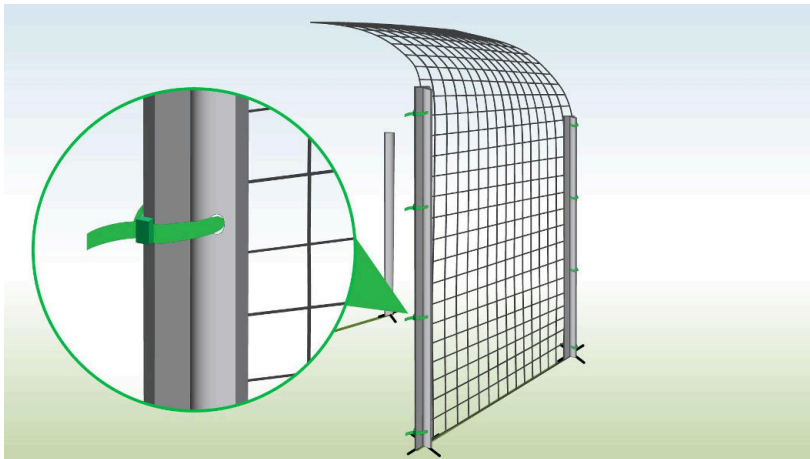

Measure your area and mark your post locations according to your plan.

**Step 2: Install the Posts**

Drive your T posts at least 50cm into the ground, making sure the flat side of each post is facing inward.

**Step 3: Bend Panel**

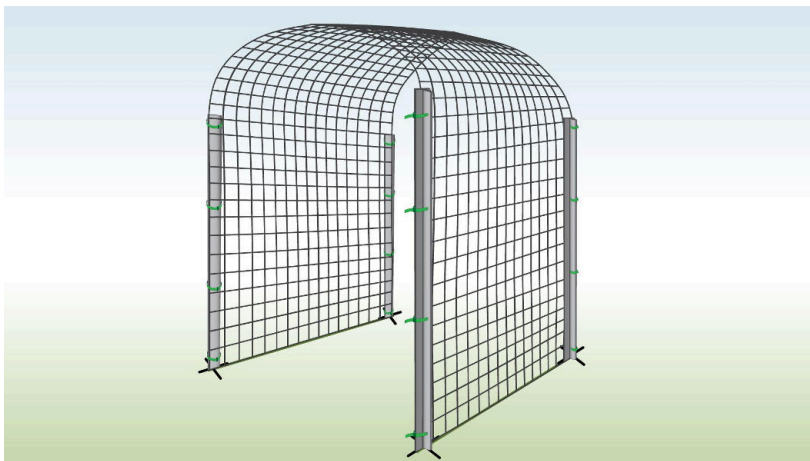

Position one of the panels and bend the top to create an archway.

Step 4: Secure Panel

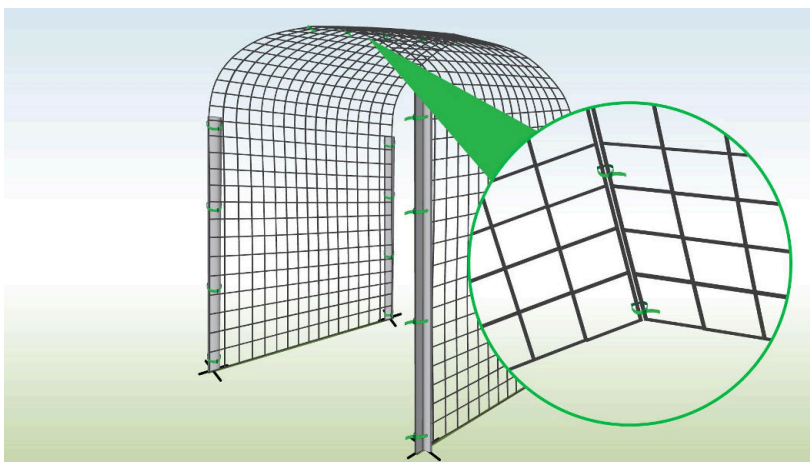

Secure it to the posts using cable ties through the pre-drilled holes.

Ensure the panel sits against the flat side of the post.

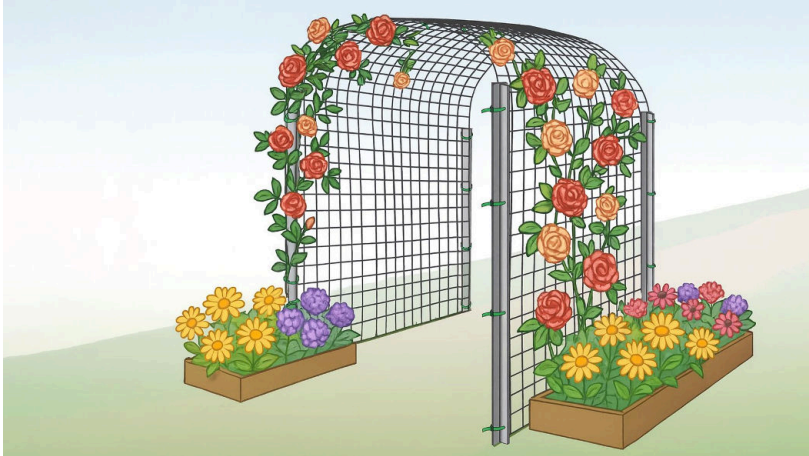

Step 5: Position the Second Panel

Position and secure the second panel, repeating the same process.

Step 6: Attach Them Together at the Top

Attach the panels together at the top using cable ties.

Step 7: Start Planting

You can now decorate the base with mulch or start training climbing plants up your new trellis.
