# HOW TO PAINT CHICKEN WIRE
Using Spray Paint

THINGS YOU'LL NEED

- [Chicken wire](#)
- Old newspapers
- Wire cutters
- Protective gloves
- Spray paint (must be suitable for metals)

INSTRUCTIONS

- Work in a well-ventilated, dust-free area or outdoors if the weather is not windy.
- Cover the work area with old newspapers to make it easier to clean up after you're done.
- Gather the necessary items and tools for the project.
- Select the colour you would like your mesh to have and choose the spray paint accordingly.

- Cut the mesh to the dimensions you desire.
- Make sure to wear protective gloves to shield your hands as the wire can be cut easily but the sharp edges can cut into your skin.

- Follow the directions on the can.
- Spray the chicken wire with an even coat of paint.

- Flip the piece of mesh to the other side.
- Coat it in an even layer of spray paint.

- Allow the chicken wire to dry completely.
- That's it, you're done!
