

## HOW TO INSTALL STAPLES Using Wooden Posts

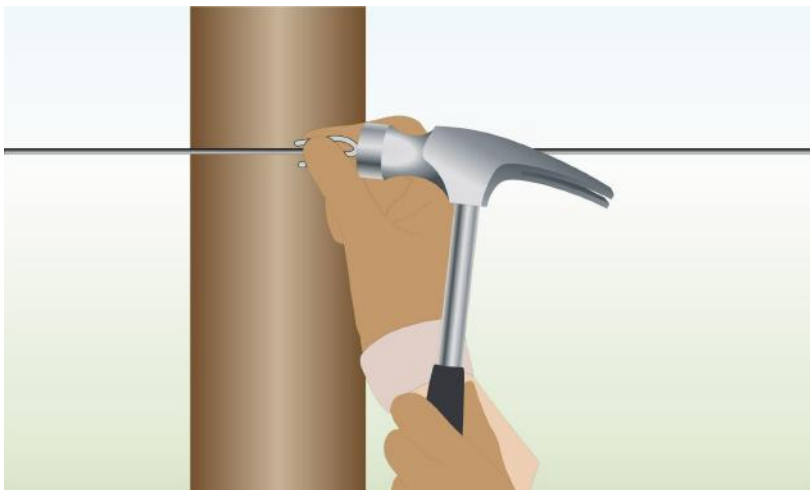

### THINGS YOU'LL NEED

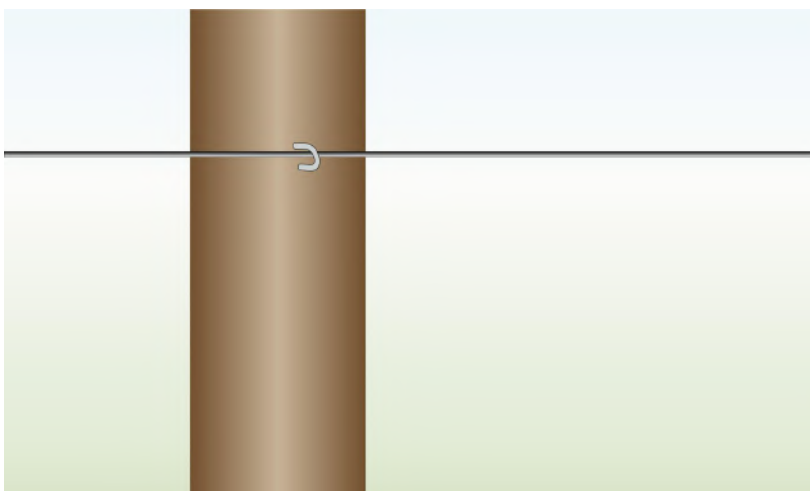

- [Staples](#)
- Hammer
- Protective gloves

**INSTRUCTIONS****Step 1: Position the Staples**

Choose the location on the wooden posts where you want to attach the staples. If you're using the staples to secure wire or fencing, ensure they are evenly spaced and at the appropriate height.

**Step 2: Start Hammering**

Hold the hammer with your other hand and position it directly above the staple. Ensure you aim for the center of the staple when hammering.

**Step 3: Check the Staple**

After hammering, inspect the staple to ensure it's securely attached to the wooden post. If it's loose or not fully driven in, use the hammer to make necessary adjustments.
