

HOW TO MAKE A Christmas Wreath

What You'll Need:

- Chicken wire
- 2x Wreath frames
- Floral wire
- Aluminium wire
- Protective gloves
- Pliers
- Wire cutters
- Glue gun
- Pine branches
- Berry sprigs
- Christmas ornaments
- Sketch of Christmas sign (Op.)

1 Gather Your Materials

Collect all the necessary materials and tools listed above.

Decide the color scheme and style of your wreath to plan the decorations.

2 Secure the Frames Together

Place the two wreath frames together. Twist them tightly at the top using aluminum wire.

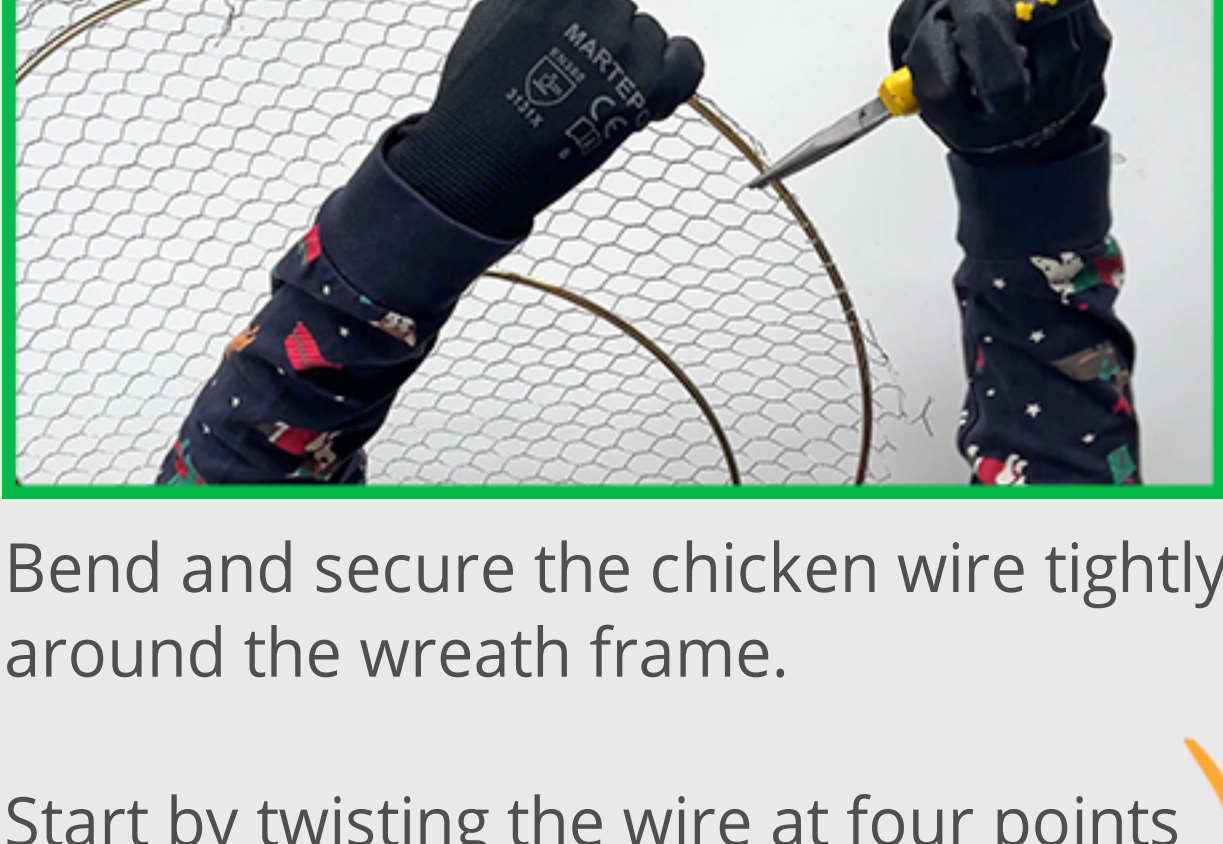

3 Measure the Chicken Wire

Measure the chicken wire to fit the size of the larger wreath frame.

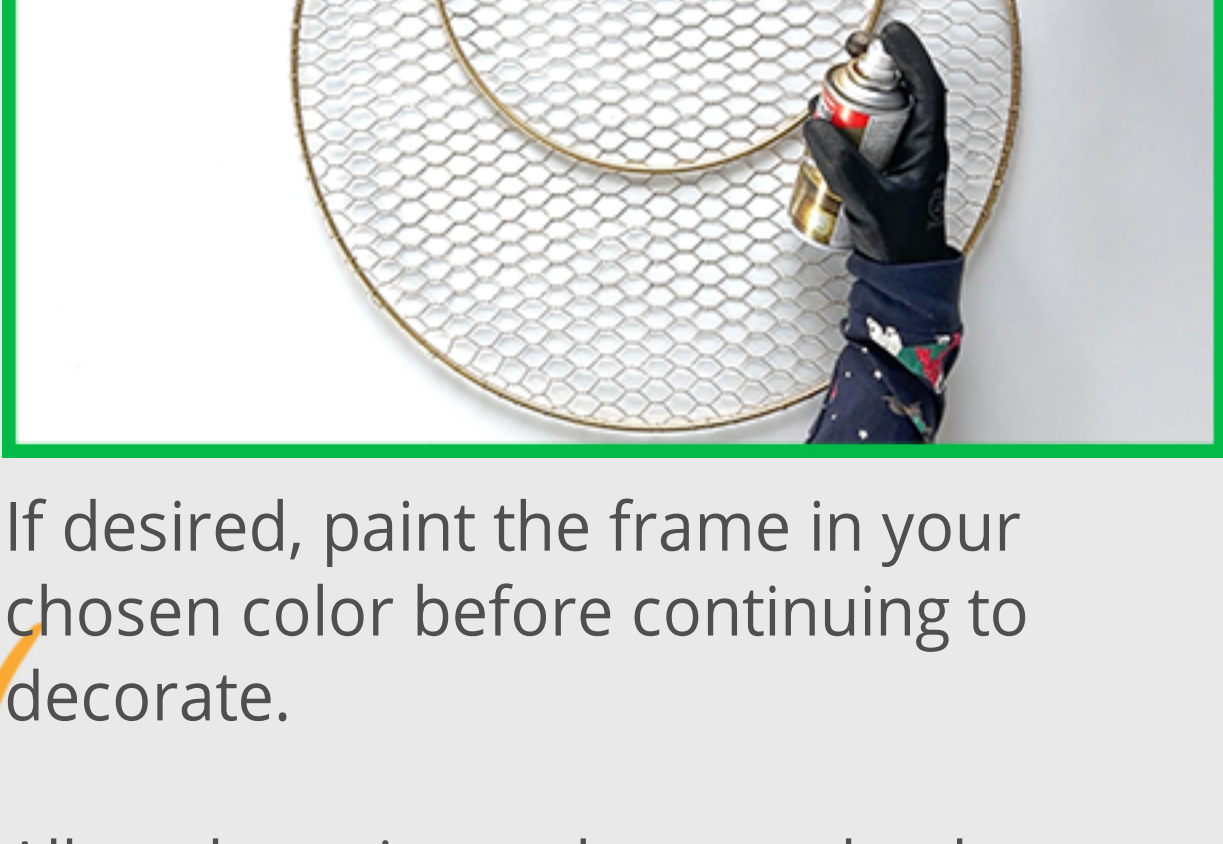

Leave an extra 2 cm of chicken wire around the edges for bending.

4 Cut the Chicken Wire

Use pliers or wire cutters to carefully cut the chicken wire to the measured size.

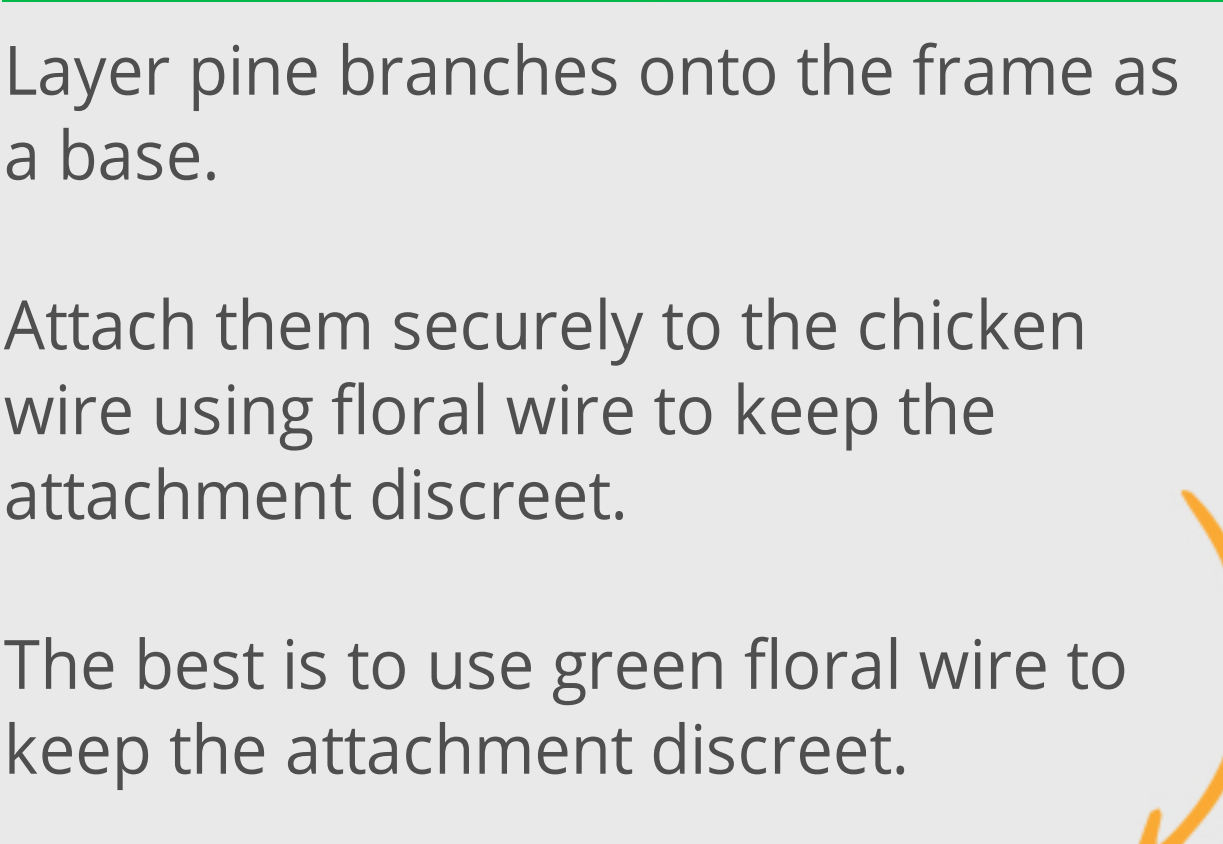

5 Attach Wire to the Frame

Bend and secure the chicken wire tightly around the wreath frame.

Start by twisting the wire at four points around the frame to keep it evenly stretched and stable.

6 Paint the Wreath (Optional)

If desired, paint the frame in your chosen color before continuing to decorate.

Allow the paint to dry completely.

7 Start Decorating

Layer pine branches onto the frame as a base.

Attach them securely to the chicken wire using floral wire to keep the attachment discreet.

The best is to use green floral wire to keep the attachment discreet.

8 Continue Decorating

Arrange and attach ornaments, berry sprigs, and other decorative elements to the greenery.

Distribute the decorations evenly or as per your desired design.

9 Shape the Wire Sign

Use aluminum wire to create the "Merry Christmas" sign.

You can follow a pre-drawn or printed sketch for accuracy.

10 Attach the Wire Sign

Secure the wire sign to the chicken wire frame using a glue gun.

11 Enjoy Your Christmas Wreath

Congratulations! Your Christmas wreath is ready. Hang it on a door, wall, or any space to enjoy the festive spirit.
