

DIY TRELLIS

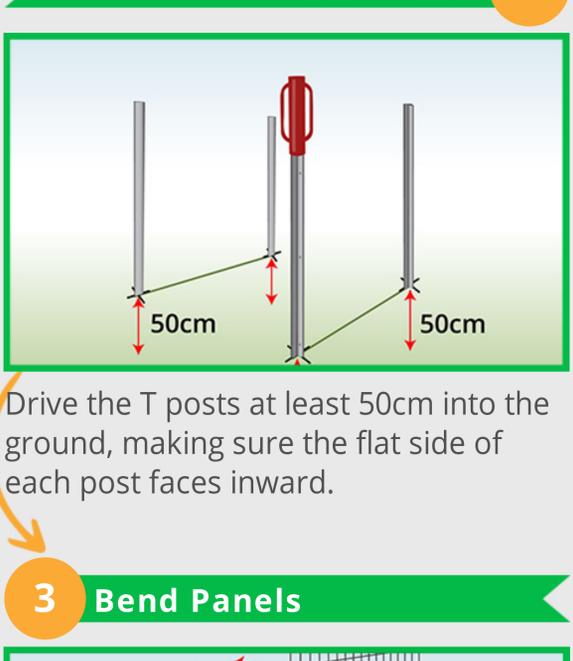

3 Different Methods

DIY TRELLIS ARCH

What You'll Need:

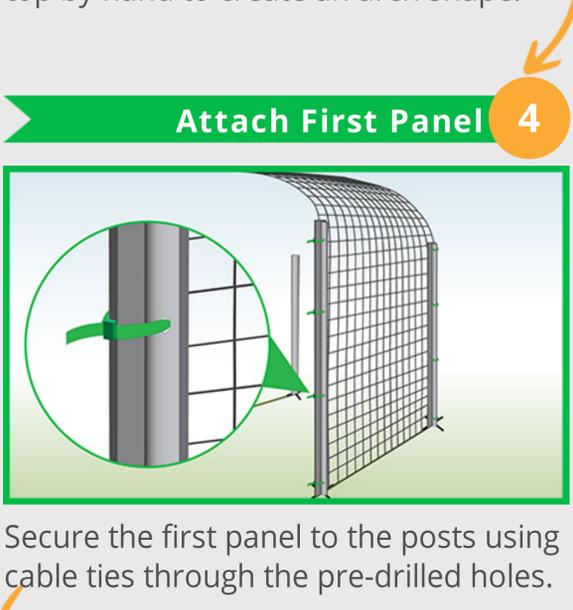

- Protective gloves
- Cattle panels
- T Posts
- Cable ties
- Tape measure
- Post driver

1 Measure Your Area

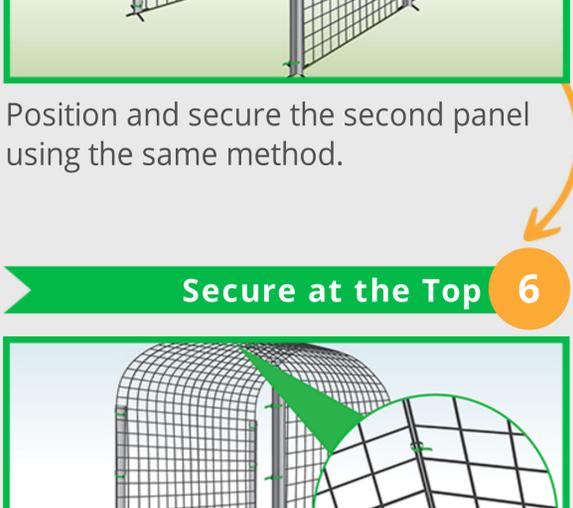

Measure and mark the area, including the post positions, based on your plan.

2 Install Posts

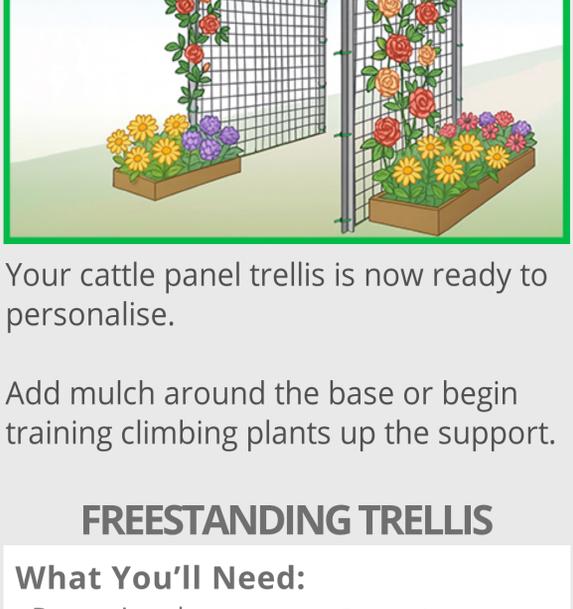

Drive the T posts at least 50cm into the ground, making sure the flat side of each post faces inward.

3 Bend Panels

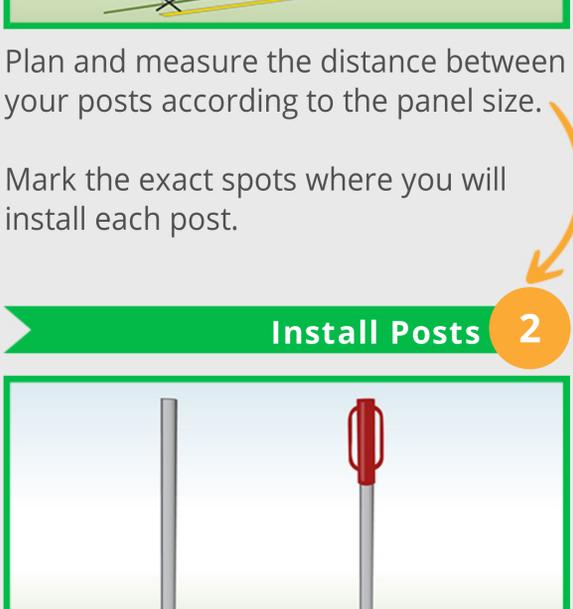

Position one panel and gently bend the top by hand to create an arch shape.

4 Attach First Panel

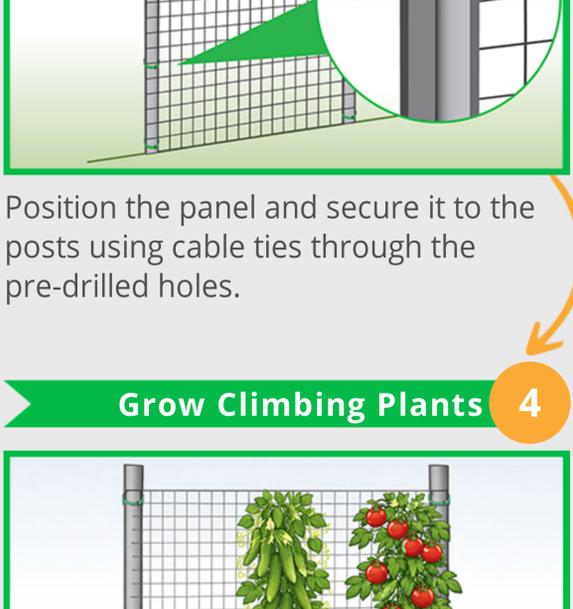

Secure the first panel to the posts using cable ties through the pre-drilled holes. Make sure the panel sits against the flat side of the post.

5 Secure Second Panel

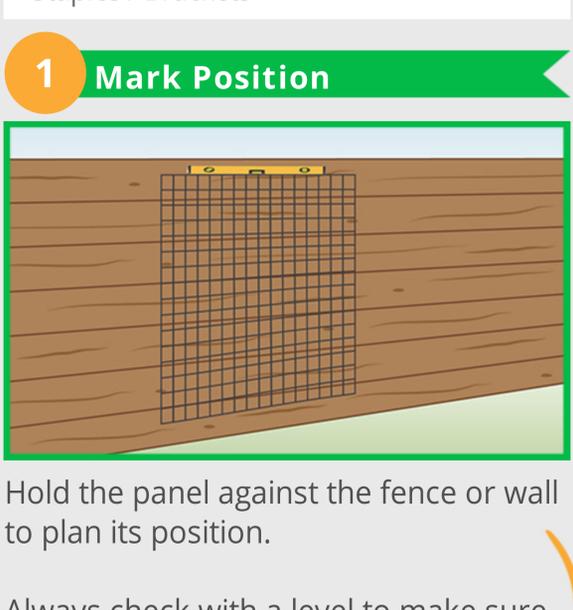

Position and secure the second panel using the same method.

6 Secure at the Top

Attach the panels together at the top with cable ties.

7 Train Climbing Plants

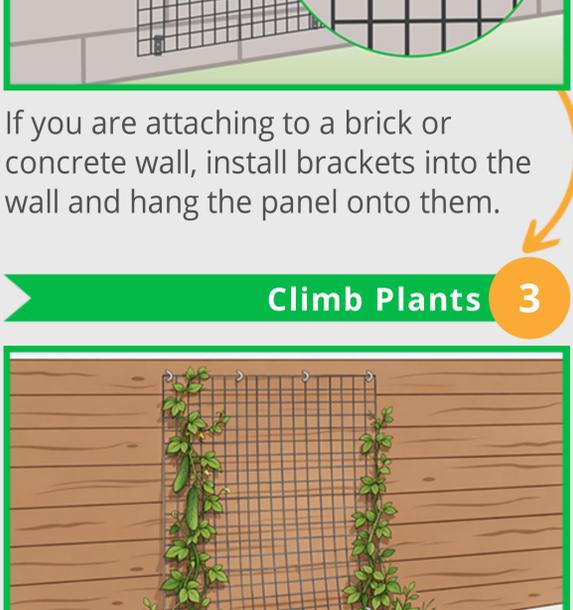

Your cattle panel trellis is now ready to personalise. Add mulch around the base or begin training climbing plants up the support.

FREESTANDING TRELLIS

What You'll Need:

- Protective gloves
- Cattle panel
- T posts
- Cable ties
- Tape measure
- Post driver

1 Plan & Measure

Plan and measure the distance between your posts according to the panel size. Mark the exact spots where you will install each post.

2 Install Posts

Drive your posts at least 50 cm into the ground.

3 Position & Secure Panel

Position the panel and secure it to the posts using cable ties through the pre-drilled holes.

4 Grow Climbing Plants

Once your DIY trellis is ready, you can start growing your climbing plants.

MOUNTED TRELLIS

What You'll Need:

- Protective gloves
- Cattle panel
- Staples / Brackets
- Tape measure
- Level

1 Mark Position

Hold the panel against the fence or wall to plan its position. Always check with a level to make sure it is straight before fixing.

2A Staple to Wood

If you are attaching to wood, simply staple the panel to the wood at the top and bottom.

2B Fixing to Brick

If you are attaching to a brick or concrete wall, install brackets into the wall and hang the panel onto them.

3 Climb Plants

Plant your seedlings along the base of your DIY trellis and watch them grow.
