HOW TO JOIN
Gabion Baskets Together

What You'll Need:
- Gabion baskets
- Helicals
- Protective gloves
- Bolt cutter

1 Pre-Assemble Gabions

Start by securing the corners of the first gabion basket, leaving the side where it will connect to the next wire cage free.

Repeat the same process with the second cage.

Align Baskets 2

Align the second cage with the first and continue the process of how to secure gabion baskets along the connecting side.

3 Join the Edges

Hold the edges close, then twist the helical connector around all four edges to join the cages securely.

Continue Twisting 4

Continue twisting the helical connector until you reach the bottom.

5 Cut off Excess

Cut off excess helical wire with bolt cutters, if needed.

Connect at the Back 6

Connect the back edges of the cages using the same method, twisting the helical from top to bottom.

Now the how to join gabion baskets together process is complete.

7 Close the Lid

Next, close the lids to finish assembling the wire cages.

If you're filling them with stone, do so before closing the lid.

Secure the Lid 8

Secure the lid with helical connector.

7 Finished Project

Now you have finished securing two baskets.

Continue the process to secure the rest, if needed.
